

Measure Authoring Tool 6.10 QDM and FHIR

MAT Maintenance Release
July 22, 2021

Included in the MAT 6.10 Maintenance Release:

- Validate Codes containing "/". Display a clearer error message when VSAC cannot retrieve a code
- Correction for CQL Errors Failing to Display on QDM Measure Load in CQL Editor
- Now able to add CQL Library in includes section(helper UI) when search is not specific to Library name
- FHIR Measures: Do not require that all functions have a parameter
- Allow user to create new measure when the CQL library name provided already exists, after they've corrected the library name
- Timezone Display on History UI should be UTC

Included in the MAT 6.10 Release:

- FHIR - Function/Define Return Type no longer disappears on Save for one measure
- FHIR - Includes UI: Adding FHIRHelpers no longer adds nonexistent version
- Harp support page should display for a revoked user
- With FHIR toggle Off, New CQL Libraries create FHIR model
