

MAT & Bonnie User Group

January User Group

Hosted by:

SemanticBits

January 26, 2022

Disclaimer

This meeting is being recorded to ensure notes and action items are captured accurately.

Attendees who have objections to the meeting being recording are asked to let the facilitator know at this time.

Agenda and Objectives

Agenda

1. MAT Updates
2. Bonnie Updates
3. Tool Modernization - MADiE Updates
4. Community Questions & Discussion
5. Review of Resources

Objectives

- Inform MAT & Bonnie users of current and planned activities
- Create a forum to gather community feedback on future enhancements
- Foster Collaboration through open community discussion

Measure Authoring Tool

MAT 6.10 QDM & FHIR

Measure Authoring Tool: Current State

MAT 6.10

- MAT 6.10
- Maintenance release on 1/25/22 included:
 - Security update to address a potential vulnerability
 - No changes to the tool
- Release Notes are available on the MAT web site under Training and Resources
- QDM measures continue to use version 1.5.3 of the CQL-ELM translator.
- FHIR measures continue to use version 1.5.4 of the CQL-ELM translator.

Measure Authoring Tool

Maintenance:

- No planned maintenance releases at this time.
- Maintenance is usually zero down time.
- Any known downtime for maintenance will be communicated to all users via email.

Bonnie

Bonnie 4.3.0 QDM (Prior)

Bonnie 5.1.1 QDM

Bonnie 6.2.2 FHIR

Bonnie Prior: Current State

Bonnie 4.3.0 Prior

- Supports QDM 5.5
- Requested patient conversion defaults implemented
- Users use HARP IDs for authentication
- Group Account functionality is available
- Users will receive a warning after 10 minute of inactivity and logged out after 15 minutes
- Bonnie 4.3.0 Prior maintenance release on 9/8/21
 - Patient conversion functionality re-enabled
 - Milliseconds no longer included in conversion
 - Patient description included in conversion

Bonnie QDM: Current State

Bonnie 5.1.1 QDM

- Released into production on 12/3/21
 - Incorporates version 2.3.3 of the CQL Execution Engine ([BonnieMAT-1055](#))
 - Enhances Bonnie to properly parse ELM files that contain comments ([BonnieMAT-1031](#))
- Supports QDM 5.6
- Supports QDM/CQL to CQL 1.5
- Patient conversion functionality will remain disabled

Bonnie FHIR: Current State

Bonnie 6.2.2 FHIR

- Released into production 12/21/21
 - Incorporated version 2.3.3 of the CQL Execution Engine ([BonnieMAT-1005](#))
 - Enhances Bonnie to properly parse ELM files that contain comments ([BonnieMAT-1032](#))
 - Increased application timeout from 15 to 30 minutes

Currently Supported Attributes are linked on the Bonnie and MAT issue tracker on the summary page:

- <https://oncprojecttracking.healthit.gov/support/projects/BONNIEMAT/summary>

Bonnie

Maintenance:

No planned maintenance currently.

Known Issues:

1. The QRDA export is not correctly reflecting relevant date time. There is no workaround. We don't have plans to address this in Bonnie at this time.
2. For Bonnie FHIR, measures that include stratification are not displaying properly for users to test. There is no workaround at this time. We don't have plans to address this in Bonnie at this time.

MADiE

Development and User Acceptance Testing (UAT) Updates

MADiE Timelines

UAT Preparation:

- Recruitment - MADiE Ambassadors and CMS contracted measure developers
- Technology Set up - MADiE UAT environment will exist behind a firewall, requiring testers to have Zscaler
- Testers will be provided with UAT scripts
- Feedback will be collected using the Bonnie MAT page in ONC Jira – confirm you have an ONC Jira account
- Individuals interested in testing should send an email to sb-mat-help@semanticbits.com
- System preparation instructions will be provided to gain appropriate access

UAT Timelines:

- First UAT release target for early February 2022
- Drops with incremental adds to features will occur until MVP is achieved
- Projected releases every two months until the Fall of 2022
- Each testing cycle will run for 2 weeks – access will only be available during the active testing cycles
- MVP for public use targeted for Fall 2022

MADiE UAT Preparation

UAT Preparation Tips:

- If you already have an account in the HARP IMPL environment:
 - Confirm you have QualityNet-Zscaler installed
 - Confirm you have a HARP IMPL account and send us your username
- Testing your access:
 - You will be able to see the <https://test-bonnie.hcqis.org/> webpage but you will not be able to log into this page
- If you set up your HARP IMPL account and did not include **'impl.'** at the beginning of your username this will not impact your participation in UAT
- We are proofing HARP IMPL usernames in batches and will send a confirmation email after your account has been processed and approved

MADiE UAT Experience

What UAT Testers and MADiE Ambassadors can expect:

- UAT Testers will have the opportunity to attend:
 - UAT Drop Kick Off meetings at the beginning of every cycle
 - UAT Wrap Up meetings to reflect on findings and discuss reactions for the testers
- UAT cycles and MADiE access will be limited to the testing cycle for each drop (2 weeks)
- UAT Testers will complete a Feedback Form and submit it using ONC Jira at the conclusion of their testing for each Drop
- Due to the iterative nature, data is for testing purposes only and may not be retained between UAT Drops
- MADiE Ambassadors who are NOT UAT Testers may still be contacted during this UAT process for feedback regarding features and prioritization – stay tuned!

Community Questions & Discussion

User Group Discussion

- Topic suggestions and questions for the User Group can also be submitted through the Bonnie MAT Issue Tracker located here: <https://oncprojecttracking.healthit.gov/support/projects/BONNIEMAT/summary>
- Additional questions or comments can be submitted by using the chat feature or raising your hand and we will unmute your line.
