

Measure Authoring Tool 6.10

MAT Maintenance Release
July 18, 2022

Included in the MAT 6.10 Maintenance Release:

- Newly created FHIR measures and libraries now reference the updated versions of the following libraries:
 - FHIR Helpers, called FHIRHelpers, version 4.1.000
 - Supplemental Data Elements, called SupplementalDataElementsFHIR4, version 3.0.000
 - MAT Global, version 7.0.000
- Any existing FHIR measure or library will need to be updated by a user with edit access, to incorporate these newer versions of the FHIR Helpers, Supplemental Data Elements and MAT Global libraries.
- When incorporating these updated versions of libraries, users may need to update existing measure logic to resolve error messages.
- QDM measures converted to FHIR measures after the release will reference the updated version of the libraries.
- For QDM/CQL measure packages, file names for the primary measure CQL, XML, JSON and HQMF files have been updated to include the revision number of '.xxx' at the end of the file name. This update corrects a known issue of the file names in the package not including the revision number by aligning with the naming convention used in the HQMF file.

Contact Us

The MAT can be accessed from the MAT public web site [here](#).

The User Guide is located [here](#) on the MAT public web site, under the Training and Resources page.

The MAT support team is available to answer questions and to provide user support.

Please continue to contact MAT Support through the Bonnie and MAT Issue Tracker here: <https://oncprojecttracking.healthit.gov/support/projects/BONNIEMAT/summary>.
