Included in the MAT 6.10 Maintenance Release:

- Measure owners have the ability to transfer FHIR measures from MAT to MADiE.
  - Select the measure and click on the Export tab
  - Select the Transfer to MADiE radio button
  - Click on the Save/Open button
  - Measure owners will see the radio button disabled. Log in to MADiE to view the measure.
- Only FHIR measures can be transferred.
- While a measure does not need to be versioned to transfer, clicking the transfer button will initiate the measure to be packaged and then transferred.
- Composite measures cannot be transferred to MADiE.
- Once a measure is transferred to MADiE it cannot be transferred again.
- The CMS ID can only be issues in the MAT. If a CMS ID is needed for a measure, it will need to be assigned in the MAT before it is transferred to MADiE.
- Once measures are moved from MAT to MADiE there is no longer an association between the applications. Changes in MAT will not be reflected in MADiE and vice versa.
- For Cohort and Proportion measures with stratifications, the measure group(s) will be created, but no stratification data will be transferred.
- For Continuous Variable measures, no measure group(s) will be created.
- For Ratio measures, the measure group(s) will be created but no measure observation data will be transferred.
