

MADiE 1.0.7 Release Notes

The following updates are included in the MADiE 1.0.7 release:

Category	Feature Description
Test Case JSON Defaults	When a Bonnie FHIR test case JSON is successfully imported into MADiE, relevant defaults are added into the JSON prior to the test case being visible to the user, in the JSON editor. In addition to the defaults added for MADiE 1.0.6 the following defaults will be added where relevant: <ul style="list-style-type: none">• MedicationRequest.requester• Condition.category
Measure Versioning and Drafting	MADiE has been updated to enable measure versioning and drafting.
508 Compliance	Updates were made to test case status to ensure 508 compliance.
Test Case Execution	MADiE has been updated to use version 1.0.6 of the FQM-Execution Engine. FQM-Execution Engine release notes can be found here .
CQL Editor	MADiE has been updated to improve error handling on the CQL editor.
Measure Calculation	MADiE has been updated to support test cases for ratio measure observations with two initial populations.
Measure Creation	On the Details tab for a measure, Risk Adjustment has been removed.
Measure Creation	MADiE has been updated to use version 2.6.0 of the CQL-to-ELM Translator. CQL-to-ELM Translator release notes can be found here .
Population Criteria	The fields on the Population Criteria Tab have been reorganized to allow descriptions to be added where necessary.
