

MADiE 1.1.5 Release Notes

The following updates are included in the MADiE 1.1.5 release:

| Category | Feature Description |
|--------------------------------------|--|
| QDM Measure and Library Creation | <p>MADiE has been updated to support QDM Measure and Population Criteria creation. Users can now:</p> <ul style="list-style-type: none">• Create a QDM measure<ul style="list-style-type: none">○ Create group(s)○ Add Stratifications to a group• Create a standalone QDM Library |
| Test case validation message updates | <p>QI-Core test case validation errors have been updated to allow users to easily differentiate between error messages, Meta.profile warning messages and all other warning messages::</p> <ul style="list-style-type: none">• Meta.profile warning messages appear with a blue background in order to differentiate them from other warning messages (yellow background) or error messages (red background)• Error messages are now preceded with "Error:"• Warning messages are now preceded with "Warning:"• Meta.profile warning messages are now preceded with "Meta.Profile:" |
| Resolved Known Issues | <p>Date Added: 4/20/2023 BONNIEMAT-1442</p> <p>Currently, measure sharing is being affected when a draft or version is created for a measure.</p> <p>Measures owned by a user:</p> <p>When a user creates a version/draft of a measure that they own, they will remain the measure owner for the version(s)/draft(s) they create. If another user needs to edit the draft or create a draft from the version(s), this measure owner would need to submit a measure sharing request for another user to have the ability to make edits in the measure or test cases. Until that sharing request is submitted and completed the version/draft would be view only on the 'All Measures' tab.</p> <p>Any measure sharing that was completed for a prior version doesn't carry forward with the version/draft that is being created and a new measure sharing request will need to be submitted.</p> <p>Measures shared with another user:</p> <p>When a user creates a version/draft of a measure that is shared with them, they will be the measure owner for the version(s)/draft(s) they create, and the original measure owner does not have editing ability. If another user needs to edit the draft or create a draft from the version(s), the measure owner of the new version/draft would need to submit a measure sharing request for another user to have the ability to make edits in the measure or test cases. Until that sharing request is submitted and completed the version/draft would be view only on the 'All Measures' tab.</p> |
