MADiE 2.2.5 Release Notes

The following updates are included in the MADiE 2.2.5 release:

Category	Feature Description
Test Case Creation	The timestamp has been added to the Last Saved column on the test case list screen.
Measure Exports	MADiE will now notify users when a measure export fails because there is a mismatch between the SDE definitions in the CQL and the SDE on the Population Criteria tab. (MADIE-2195, MADIE-2223)
Test Case Exports	**QI-Core Measures:** • The Case # for every test case is now included in the test case export package README.txt file. • The test case export file will include a list of invalid test cases not included in the export at the bottom of the README.txt file. (MADIE-2212)
Library Creation	**QI-Core Measures:** MADiE now prevents a user from creating a draft off a QI-Core 4.1.1 library if a QI-Core 6.0.0 library (either a draft or version) has already been created for that library.
CQL-to-ELM Translator	MADiE has been updated to use CQL-ELM Translator 3.25.0. More information can be found here. (MADIE-2215, MADIE-2216, MADIE-2217)
Resolved Known Issues	**QI-Core Measures:** The human readable file for QI-Core measures are displaying the entire Measure Logic Data Requirements and Measure Logic Definitions sections twice. (MADIE-2204)
