# MADiE 2.3.6 Release Notes

The following updates are included in the MADiE 2.3.6 release:

| Category | Feature Description |
|---|---|
| Measure and Library Creation | MADiE has been updated to display the measure or library owner. The measure owner's name will display on the Shared Measures tab, All Measures tab, and the Measure Detail screen. The library owner's name will display on the Shared Libraries tab, All Libraries tab, and the Library Detail screen. (MADIE-2245) |
| Test Case Creation | **QI-Core v6.0.0 Measures:** MADiE has been updated to display a test case coverage percentage tooltip after execution has run which explains how the percentage relates to clause counts when users hover over the coverage percentage. |
| Test Case Creation | **QI-Core Measures:** MADiE has been updated to allow users to synchronize their test case JSON with the test case UI by updating the "family" field in the JSON to match the GROUP entered in the UI and the "given" field to match the TITLE from the UI. |
| Test Case Creation | **QDM Measures:** MADiE has been updated to allow users to add the following Participant attributes without requiring all fields to be completed first:<br>• Organization<br>• CarePartner<br>• Location<br>• PatientEntity<br>• Practitioner<br>The Add button will now remain enabled at all times, allowing users to enter these attributes in any order. (MADIE-2307) |
| Test Case Export | **QDM Measures:** The export process has been updated to include value sets that match an alias within the measure. (MADIE-2327) |
