

# MADiE 3.0.0 Release Notes

The following updates are included in the MADiE 3.0.0 release:

Category	Feature Description
Test Cases	<b>QI-Core Measures:</b> MADiE has been updated to allow users to create and edit QI-Core test cases through a guided interface that offers an alternative to working directly in JSON, while still allowing full access to JSON editing when needed. The Test Case UI Builder is offered as a beta release and designed to support the complete QI-Core workflow, though some uncommon scenarios may still need refinement. We welcome user feedback to help us enhance the UI Builder in future releases.
HAPI FHIR	MADiE has been updated to use HAPI FHIR version 8.8.0. More information can be found <a href="#">here</a> .
CQL-ELM Translator	<b>QI-Core Measures:</b> MADiE has been updated to use CQL-ELM Translator 4.4.0. More information can be found <a href="#">here</a> .
Resolved Known Issues	MADiE was displaying inconsistent spacing in the Human Readable for rich text-enabled metadata fields. ( <a href="#">MADIE-2344</a> )
