

MADiE 3.0.1 Release Notes

The following updates are included in the MADiE 3.0.1 release:

Category	Feature Description
Test Cases	QI-Core Measures: The Test Case Builder has been updated to provide clearer feedback when managing profiles.
Administrator Functionality	MADiE Administrator functionality has been updated.
CQL-ELM Translator	QI-Core Measures: MADiE has been updated to use CQL-ELM Translator 4.5.0. More information can be found here .
Resolved Known Issues	<ul style="list-style-type: none">Exported test cases for CV measures with observations now use the correct population code “measure-observation” instead of “measure-population-observation” ensuring exported results align with HL7 terminology expectations and improving consistency and accuracy for teams reviewing or validating measure test cases. (MADIE-2351)Duplicate action log entries have been consolidated into a single record, preventing missing data in the Share/Unshare pop-ups and ensuring users can consistently view accurate history on affected measures. (MADIE-2355)
