

MADiE 4.1.1 Release Notes

The following updates are included in the MADiE 4.1.1 release:

Category	Feature Description
Measure Creation/Export	FHIR Measures: • Composite measures can be exported, versioned, and viewed in the Human Readable format when the Measure Type field is left blank. • Composite measure workflows for managing components and test cases have been enhanced.
Administrator Functionality	MADiE Administrator functionality has been updated.
CQL-ELM Translator	MADiE has been updated to use CQL-ELM Translator 5.3.0. More information can be found here .
Resolved Known Issues	US Quality Core Measures: • Users are unable to create and/or use any references to a US Quality Core Profile in the test case builder. (MADIE-2407) • Measure export is blocked when ballot version NPM libraries are used in the measure. (MADIE-2411) • Test case patient references are not preventing duplicate patients.
