MADiE 4.2.0 Release Notes

The following updates are included in the MADiE 4.2.0 release:

Category	Feature Description
Measure Creation	The Measure CQL Library Name field on the Create Measure Modal and Details tab now includes the following: “It is strongly recommended that your library name remain under 30 characters”.
Library Creation	The Library Name field on the Create Library Modal and CQL Library editor now includes the following: “It is strongly recommended that your library name remain under 30 characters”.
Measure Creation	**FHIR Measures:** • Users now have the ability to choose specific groups from component measures for inclusion in a composite measure. • A new Limitations metadata field has been added. • A new Authoritative Source metadata field has been added.
Measure Exports	**FHIR Measures:** Enhanced measure exports to support Universal Realm QM IG STU 2 requirements, including improved handling of missing metadata by displaying "None" in human-readable exports instead of leaving fields blank.
UI & Technology Updates	• Performance improvements have reduced load times on the Measures page. • MADiE has implemented technology upgrades to its CQL and JSON editors.
